Status	Finished
Started	Tuesday, 20 October 2026, 6:12 PM
Completed	Tuesday, 20 October 2026, 6:19 PM
Duration	6 mins 19 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Complete

Mark 1.00 out of 1.00

What does the Bubble Sort algorithm primarily focus on during each pass?

a. Dividing the list into halves
b. Bubbling up the largest element to its correct position
c. Sorting the entire list in one pass
d. Bubbling up the smallest element

The correct answer is: Bubbling up the largest element to its correct position

Question **2**

Complete

Mark 1.00 out of 1.00

What is sorting in the context of computer science?

a. Arranging data in a particular format
b. Searching for data in a list
c. Deleting data from a list
d. Inserting data into a list

The correct answer is: Arranging data in a particular format

Question **3**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is based on repeatedly dividing the list into halves?

- a. Bubble Sort
- b. Insertion Sort
- c. Merge Sort
- d. Quick Sort

The correct answer is: Merge Sort

Question **4**

Complete

Mark 0.00 out of 1.00

Very slow way of sorting is_____

- a. Quick sort
- b. Bubble sort
- c. Insertion sort
- d. Heap sort

The correct answer is:
Insertion sort

Question **5**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is known for its simplicity and sequential comparison of elements?

- a. Quick Sort
- b. Merge Sort
- c. Heap Sort
- d. Bubble Sort

The correct answer is: Bubble Sort

Question **6**

Complete

Mark 1.00 out of 1.00

The process of placing or rearranging a collection of elements into a particular order is known as

- a. Rearranging
- b. Searching
- c. Sorting
- d. Merging

The correct answer is: Sorting

Question **7**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm involves comparing elements and swapping adjacent items that are out of order?

- a. Bubble Sort
- b. Merge Sort
- c. Linear Search
- d. Binary Search

The correct answer is: Bubble Sort

Question **8**

Complete

Mark 1.00 out of 1.00

In Merge Sort, what happens after the two halves of the list are sorted?

- a. They are combined to form a single sorted list
- b. They are compared element by element
- c. They are split again into smaller sublists
- d. They are discarded

The correct answer is: They are combined to form a single sorted list

Question **9**

Complete

Mark 1.00 out of 1.00

_____ explain how an algorithm will perform when the input grows larger.

- a. Sorting
- b. Searching
- c. Complexity
- d. Merging

The correct answer is:
Complexity

Question **10**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm would be preferred for its divide-and-conquer approach?

- a. Linear Search
- b. Merge Sort
- c. Bubble Sort
- d. Binary Search

The correct answer is: Merge Sort

Question **11**

Complete

Mark 1.00 out of 1.00

In the context of sorting, what does the divide-and-conquer approach involve?

- a. Sorting data sequentially
- b. Sorting data in a single pass
- c. Dividing the input into parts, solving each part, and combining the solutions
- d. Rearranging data without sorting

The correct answer is: Dividing the input into parts, solving each part, and combining the solutions

Question **12**

Complete

Mark 1.00 out of 1.00

What is Bubble Sort known for?

- a. Being the most efficient sorting algorithm
- b. Sorting data in a non-sequential manner
- c. Bubbling up the largest element to its correct position with each pass
- d. Using the divide-and-conquer approach

The correct answer is: Bubbling up the largest element to its correct position with each pass

Question **13**

Complete

Mark 1.00 out of 1.00

What is a characteristic of the merge sort algorithm?

- a. It sorts data using a single pass
- b. It is less efficient than bubble sort
- c. It is based on the divide-and-conquer approach
- d. It does not require recursion

The correct answer is: It is based on the divide-and-conquer approach

Question **14**

Complete

Mark 1.00 out of 1.00

What is one advantage of sorting a list before performing a search operation?

- a. It has no effect on the search operation
- b. It increases the number of comparisons needed
- c. It allows for faster searching
- d. It makes the search operation slower

The correct answer is: It allows for faster searching

Question **15**

Complete

Mark 1.00 out of 1.00

What is a significant characteristic of Bubble Sort?

- a. It bubbles up the largest element in each pass
- b. It uses the heap data structure
- c. It divides the list into sublists
- d. It recursively sorts subproblems

The correct answer is: It bubbles up the largest element in each pass
